Dear Mr Haigh,

Re: Mitchell Clifton (Deceased)

I refer to your Regulation 28 Report, regarding the Inquest into the death of Mitchell Clifton and your comments concerning the location.

Following the accident involving Mitchell Clifton, the Co-operative introduced a number of measures at the car park entrance including road humps, lane markings and a central hatched area. A marked pedestrian route from Landywood Lane to the shop entrance was also provided.

Some of the road markings have become worn and the Co-operative has agreed to renew them. In addition, I have made arrangements for further markings to be provided on the highway to compliment the markings provided on the car park. This will involve returning the double yellow lines to the rear of the footway, extending the central hatching to the edge of the carriageway and providing a give way marking/edge of carriageway marking at the junction of the car park with Landywood Lane. These measures should highlight the presence of the Co-operative entrance for both pedestrians and vehicles.

Staffordshire
County Council

I trust this is satisfactory. Please let me know if you require anything further.

Yours sincerely,

Casualty Investigation Manager
