The hearing

When you are in the video hearing room, in the centre bottom of the screen you will see three symbols microphone, video and disconnect.

During the hearing, use the microphone button to MUTE YOUR MICROPHONE. This minimises background noises and allows everyone to hear more clearly. You can unmute the microphone when it is your turn to speak.

If you are a patient and need to take a break during the hearing to discuss matters with your solicitor you can mute your microphone, turn off your camera and communicate with your solicitor via the telephone. You need to ask the Tribunal if you can do this.

Alternatively, the Tribunal and other witnesses can mute their microphone, turn of their cameras and turn down their volume and you can communicate with your solicitor in the video hearing room alone. Make sure you are clear about the time you should return.

At the end of the hearing

The Tribunal will decide whether they announce the decision. This can be announced to a nurse and the solicitor and the patient if they want to return. You will be given a time to return if the Tribunal are going to announce the decision. Otherwise the decision will be relayed by the panel to the solicitor who will be asked to contact the patient and the MHAA.

The written decision

The timescales for delivery to the Tribunal are the same as they are in hearings at hospitals.
