Dear Mr Barlow

**Re: Response to Prevent Future Deaths Report touching the death of Mr Liridon Saliuka
(Date of Death 02.01.2020)**

This response is made on behalf of Oxleas NHS Foundation Trust in response to the Regulation 28 Report to Prevent Future Deaths dated 8th November 2022 following the inquest touching the death in custody of Mr Liridon Saliuka who died in custody in HMP Belmarsh on 02 January 2020, with the matter of concern outlined below;

To the Governor of Belmarsh and to the Chief Executive of Oxleas. There was no clear documentation (accessible by prison staff, healthcare, and social services) of the adjustments that were required for the prisoner's disability.

I am writing to inform you that following this inquest the following improvements have now been made.

When a patient is identified as requiring adjustments to their disability that these will now be documented on the Prison Nomis (P-Nomis) system. Agreement was reached following senior management review by HMP Belmarsh, Royal Borough of Greenwich Social Care and Oxleas NHS Foundation Trust. All these providers have access to p-nomis.

All prison staff have been notified of this development and healthcare administrative staff will be responsible for entering this information on P-Nomis. A fortnightly meeting involving all providers has now convened allowing discussion of patients presenting with disability that may be of concern, to facilitate improved care planning and communication.

We will audit progress made quarterly with effect from February 2023 and monitor this through our local Quality board arrangements.

I hope my response has adequately addressed your concerns.

Yours Sincerely
