3	<p>INVESTIGATION and INQUEST</p> <p>On 31st December 2022, this court commenced an investigation into the death of Amanda Jane Kramer aged 56 years. The investigation concluded at the end of the inquest on 15th August 2023. The court returned a narrative conclusion;</p> <p><i>"Mrs Amanda Jane Kramer died at her home address on 31st December 2022, she had</i></p>

	<p><i>taken an accidental, fatal overdose of Zopiclone. Mrs Kramer had been prescribed that medication for approximately 18 years, when guidance indicates it should be prescribed for the short-term treatment of insomnia. Those treating Mrs Kramer had not monitored; whether there was an ongoing need for her to receive this drug, the risks associated with the medication, or whether Mrs Kramer was compliant with dosage instructions.”</i></p> <p>Mrs Kramer's medical cause of death was determined as;</p> <p>1.a. Zopiclone Toxicity 2. Fatty Liver Disease</p>
4	<p>CIRCUMSTANCES OF THE DEATH</p> <p>Mrs Kramer was a 56-year-old female known to have suffered with depression since the 1990s. She received a diagnosis of schizoaffective disorder in 2009. Mrs Kramer also suffered with Arthritis and Fibromyalgia for which she was prescribed analgesia.</p> <p>Mrs Kramer was noted to have had multiple emergency admissions to hospital [REDACTED].</p> <p>Mrs Kramer was found unresponsive at home on 31st December 2022. Her death was caused by an overdose of prescribed hypnotic, zopiclone.</p>
5	<p>CORONER'S CONCERNS</p> <p>During the course of the inquest the evidence revealed matters giving rise to concern. In my opinion there is a risk that future deaths could occur unless action is taken. In the circumstances it is my statutory duty to report to you.</p> <p>The MATTERS OF CONCERN are as follows. –</p> <ol style="list-style-type: none"> 1. Zopiclone is a drug licenced for the treatment of short-term insomnia. The risks associated with the drug are first, that it is a central nervous system depressant and second, that patients prescribed the drug can form a dependency upon it. 2. Mrs Kramer was prescribed Zopiclone for 18 years. 3. Despite the deceased being under the care of both a GP and a secondary mental health trust prior to her death. No clear evidence emerged in this inquest that anyone had reviewed Mrs Kramer's use of this drug even when Mrs Kramer had demonstrated a pattern of high-risk behaviour by deliberately overdosing on prescribed medication.
6	<p>ACTION SHOULD BE TAKEN</p> <p>In my opinion action should be taken to prevent future deaths and I believe you [AND/OR your organisation] have the power to take such action.</p>
7	<p>YOUR RESPONSE</p> <p>You are under a duty to respond to this report within 56 days of the date of this report, namely by 6 November 2023 I, the coroner, may extend the period.</p> <p>Your response must contain details of action taken or proposed to be taken, setting out the timetable for action.
