(Attachments:) Prevention of future deaths Reg 28 (Signed).pdf

Dear [REDACTED],

Happy New Year!

Thank you for reaching out to us regarding this matter.

We would like to acknowledge receipt of your enquiry and confirm that we have discussed this case with the senior author of the original **British Society of Gastroenterology guidelines**.

Following these discussions, we understand that the group responsible for updating the guidelines in due course is aware of this very unfortunate case. They will be entering into further discussions and consultations to consider the influence and potential inclusion of underlying conditions, such as **sickle cell disease**, in any future updates to the guidelines.

Should you require any further information or clarification, please do not hesitate to contact us.

Best regards,

[REDACTED]
